• Experience

- 📅 Dec 23 - Present 📍 Adelaide, Australia
 Sr Product designer - Design QA
Ennovative Pty Ltd
 - Led end-to-end UX/UI design for multiple government portals, translating complex requirements into intuitive, user-centric interfaces.
 - Created high-fidelity UI designs, wireframes, and interactive prototypes aligned with Salesforce Lightning Design System (SLDS).
 - Led usability, UI, and accessibility testing (WCAG 2.1) to ensure inclusive, compliant, and high-quality Salesforce experiences.
 - Created and optimized complex, multi-step forms with a focus on clarity, validation logic, and error prevention for diverse user groups.
 - Collaborated cross-functionally with product owners, developers, QA, and stakeholders to ensure seamless design-to-development handoff.
- 📅 Apr 22 - Dec 23 📍 Lahore, Pakistan
 Associate UX/UI Designer
Nexrupt Technologies
 - Designed and maintained scalable Figma design systems and component libraries to ensure consistency across mobile apps, web applications, and landing pages.
 - Created wireframes, user flows, interactive prototypes, and high-fidelity UI designs using Figma for mobile and web products.
 - Partnered with product managers and developers to design intuitive, user-friendly, and visually engaging interfaces aligned with product and business goals.
 - Delivered end-to-end UI/UX solutions for mobile applications, web applications, and marketing landing pages, ensuring consistency, accessibility, and performance.
- 📅 Oct 21 - May 22 📍 Lahore, Pakistan
 Trainee UX/UI Designer
Fixel Cloud
 - Supported Ascension Healthcare in building a scalable Figma design system and component library, creating complex, reusable components with a strong focus on Auto Layout and full responsiveness.
 - Ensured each component was designed for flexibility and consistency across multiple screen sizes and use cases.
 - Contributed to comprehensive component documentation, enabling efficient adoption and consistent usage across design and development teams.
 - Designed and optimized UI components for iOS 15, strictly adhering to Apple Human Interface Guidelines (HIG) to ensure platform consistency and usability.

• Projects

City Of Melville

Designed a secure and scalable Local Government Request Portal for a council, allowing residents to easily lodge, monitor, and manage service requests online.

Ascension Design System

Collaborated with cross-functional teams to build the Accensian Design System, creating reusable components, documentation, and iOS UI aligned with platform guidelines across devices.

Hafiz Sajjad Motors (HSM)

Designed professional mobile and web applications for Hafiz Sajjad Motors, enabling used car discovery, vehicle listings, and a dedicated inspection app for detailed inspection reports.
